

Wednesday Challenge Form

Group Members: Half the class

Problem Statement: Be able to get a marble From one side to the other using half of a PVC Pipe to roll the marble.

Approach: At first we were trying to go fast And get the marble to the other side as fast as We could. After a few failed attempts we Realized that it would be easier to just move it Slowly and try to stay as steady as we could.

Solution: Move the marble slowly and try to Stay as steady and accurate as possible.

Lessons Learned: If I were to do this again I would make Sure to move the marble slowly and try to be more Cooperative and not yell at eachother
